

NOZZEL HEATERS

Nozzle heaters are used for extruders, blowing machines, injection molding machines and in the plastics industry.

They may be loaded with up to 5 W/cm², resulting in a very quick and stable working temperature in the item.

By default, the nozzle heaters are made of brass with a 30° axial cable outlet with a 500 mm supply line. The supply line is protected by metal braiding. The diameter can vary from Ø25 to 100 mm and the height from 20 to 90 mm. Max. temperature, 340°C. Power tolerance: + 5% -10%

Should you need custom made stainless steel nozzle heaters, other sizes, with radial or tangential cable outlets, or other modifications, please contact us.
